Who We Are

- AAIDA is 501c3 dedicated to patients living with immune dysregulation conditions. Efforts we focus on include advocacy campaigns, educational initiatives for patients and healthcare providers and research opportunities.
- In 2021 AAIDA incorporated free monthly educational webinars on multiple topics and disease states that affect AAIDA's patient community. This includes autoimmune conditions, immunodeficiencies, holistic health, patient advocacy topics, medication access and more. This series is open to those wanting to learn more about immune-related topics. Guest speakers range from physicians, patients, nurses, care givers, pharmacists and others. Our webinars are recorded live and then added to the AAIDA website and YouTube channel as a free resource for our community.
- Interested in being a speaker? Email us! Info@GoDoAaida.org
